When it comes to standing desks there are the hydraulic tables that have flooded the US market over the past ten years and there are beautiful looking standing desks that are actually furniture and not just table tops affixed on top of a set of hydraulic legs. Which will look best in your office? The choice is clear. Of course, fine furniture is going to cost more than bare hydraulic steel legs but which do you want for your executive office, something that looks like it belongs in a science lab or a fine piece of furniture that matches your existing office decor? And when you consider the improved productivity that comes from a standing desk, how can you put a value on that? Most of us think better on our feet. But, that being the case doesn't necessarily mean we want to be standing all day long. With our standing desks, you can rotate from sitting to standing in half-hour intervals throughout the day for maximum efficiency using a stool or using your stand up desk as an extra desk for maximum productivity.

Many customers have told us our da Vinci line of standing desks are the most beautiful stand-up desks on the market today. We tend to agree. When properly configured with the right wood species and leather inlay you'd be hard pressed to find a more attractive stand-up desk anywhere. We are proud this model was selected more than once for executives inside the White House and we have dozens of military officers who use this model in the Pentagon as well as Military bases throughout the U.S., Japan, and Europe.

Let us find the perfect stain, wood, and leather to make your Da Vinci a one-of-a-kind masterpiece in your home or office.
